

CAUSES OF BANK FAILURES GREAT DEPRESSION US

UNDERSTANDING THE CAUSES OF BANK FAILURES DURING THE GREAT DEPRESSION IN THE US

CAUSES OF BANK FAILURES GREAT DEPRESSION US REVERBERATED THROUGH THE AMERICAN ECONOMY, LEAVING A TRAIL OF DEVASTATED INDIVIDUALS AND BUSINESSES. THE DECADE-LONG ECONOMIC DOWNTURN, OFFICIALLY BEGINNING IN 1929, WAS EXACERBATED BY A CASCADING SERIES OF BANK COLLAPSES. UNDERSTANDING THE INTRICATE WEB OF FACTORS THAT LED TO THESE FAILURES IS CRUCIAL FOR COMPREHENDING THE SEVERITY OF THE GREAT DEPRESSION AND ITS LASTING IMPACT. THIS ARTICLE WILL DELVE DEEPLY INTO THE PRIMARY REASONS BEHIND THESE WIDESPREAD BANK INSOLVENCIES, EXAMINING THE INTERCONNECTED ECONOMIC, REGULATORY, AND PSYCHOLOGICAL ELEMENTS THAT FUELED THE CRISIS. WE WILL EXPLORE THE ROLE OF SPECULATIVE BUBBLES, AGRICULTURAL DISTRESS, FLAWED MONETARY POLICY, AND THE DEVASTATING PHENOMENON OF BANK RUNS.

SPECULATIVE BUBBLES AND OVERLEVERAGING

ONE OF THE MOST SIGNIFICANT CONTRIBUTING FACTORS TO THE WIDESPREAD BANK FAILURES LEADING UP TO AND DURING THE GREAT DEPRESSION WAS THE RAMPANT SPECULATION, PARTICULARLY IN THE STOCK MARKET DURING THE LATTER HALF OF THE 1920S. THE DECADE WAS CHARACTERIZED BY A PERIOD OF UNPRECEDENTED ECONOMIC OPTIMISM, WHICH FUELED A SPECULATIVE MANIA. INVESTORS, OFTEN USING BORROWED MONEY (ON MARGIN), POURED VAST SUMS INTO STOCKS, DRIVING PRICES TO UNSUSTAINABLE LEVELS DETACHED FROM UNDERLYING COMPANY VALUES. BANKS, EAGER TO PROFIT FROM THIS BOOM, READILY LOANED MONEY TO THESE SPECULATORS AND ALSO INVESTED HEAVILY IN THE STOCK MARKET THEMSELVES.

THIS OVERLEVERAGING CREATED A FRAGILE FINANCIAL SYSTEM. WHEN THE STOCK MARKET CRASHED IN OCTOBER 1929, IT TRIGGERED A RAPID AND SEVERE DECLINE IN ASSET VALUES. BANKS THAT HAD HEAVILY INVESTED IN STOCKS SAW THEIR PORTFOLIOS DECIMATED. SIMULTANEOUSLY, INDIVIDUALS AND BUSINESSES THAT HAD BORROWED HEAVILY TO INVEST FOUND THEMSELVES UNABLE TO REPAY THEIR LOANS AS THEIR INVESTMENTS EVAPORATED. THIS LED TO A SURGE IN LOAN DEFAULTS, DIRECTLY IMPACTING BANK SOLVENCY. THE RIPPLE EFFECT WAS IMMENSE, AS THE LOSS OF CONFIDENCE IN THE STOCK MARKET QUICKLY TRANSLATED INTO A LOSS OF CONFIDENCE IN THE BANKING SYSTEM ITSELF.

MARGIN BUYING AND ITS CONSEQUENCES

MARGIN BUYING, A PRACTICE WHERE INVESTORS COULD PURCHASE STOCKS BY PAYING ONLY A FRACTION OF THE PRICE AND BORROWING THE REST FROM BROKERS, WAS A MAJOR DRIVER OF THE SPECULATIVE BUBBLE. THIS LEVERAGE AMPLIFIED BOTH GAINS AND LOSSES. WHEN STOCK PRICES BEGAN TO FALL, BROKERS ISSUED MARGIN CALLS, DEMANDING REPAYMENT OF THE BORROWED FUNDS. MANY INVESTORS WERE UNABLE TO MEET THESE CALLS, LEADING TO FORCED SELLING OF SHARES AT PROGRESSIVELY LOWER PRICES, FURTHER ACCELERATING THE MARKET'S DECLINE AND CREATING A VICIOUS CYCLE THAT DRAINED LIQUIDITY FROM THE FINANCIAL SYSTEM.

INVESTMENT TRUSTS AND SPECULATIVE VEHICLES

THE ERA ALSO SAW THE RISE OF INVESTMENT TRUSTS, WHICH WERE ESSENTIALLY POOLED INVESTMENT VEHICLES THAT OFTEN ENGAGED IN HIGHLY SPECULATIVE STRATEGIES. THESE TRUSTS, WHILE SOMETIMES PRESENTED AS DIVERSIFIED AND SAFE, FREQUENTLY INVESTED HEAVILY IN A NARROW RANGE OF STOCKS OR ENGAGED IN COMPLEX FINANCIAL MANEUVERS. THEIR COLLAPSE DURING THE MARKET DOWNTURN FURTHER ERODED INVESTOR CONFIDENCE AND CONTRIBUTED TO THE BROADER FINANCIAL INSTABILITY.

AGRICULTURAL DISTRESS AND RURAL BANK FAILURES

LONG BEFORE THE 1929 STOCK MARKET CRASH, THE AGRICULTURAL SECTOR OF THE UNITED STATES WAS EXPERIENCING SIGNIFICANT DISTRESS. FOLLOWING WORLD WAR I, EUROPEAN AGRICULTURAL PRODUCTION RECOVERED, LEADING TO A GLUT OF AMERICAN FARM PRODUCTS ON THE MARKET AND A SHARP DECLINE IN COMMODITY PRICES. FARMERS, MANY OF WHOM HAD BORROWED HEAVILY TO EXPAND PRODUCTION DURING THE WAR YEARS, FOUND THEMSELVES UNABLE TO REPAY THEIR DEBTS. THIS WIDESPREAD AGRICULTURAL INSOLVENCY PLACED IMMENSE PRESSURE ON THE THOUSANDS OF SMALL, RURAL BANKS THAT PRIMARILY SERVED THESE FARMING COMMUNITIES.

THESE RURAL BANKS WERE HEAVILY EXPOSED TO THE FORTUNES OF LOCAL FARMERS. AS FARM INCOMES DWINDLED AND FORECLOSURES INCREASED, THESE BANKS BEGAN TO STRUGGLE. THEY HELD FARM MORTGAGES THAT WERE INCREASINGLY UNLIKELY TO BE REPAID, AND THEIR DEPOSITS WERE ALSO DECLINING AS FARMERS HAD LESS INCOME TO SAVE. THIS CHRONIC WEAKNESS IN THE AGRICULTURAL SECTOR CREATED A PERSISTENT VULNERABILITY WITHIN THE BANKING SYSTEM, MAKING MANY RURAL BANKS PARTICULARLY SUSCEPTIBLE TO ANY BROADER ECONOMIC SHOCK.

FALLING COMMODITY PRICES

THE DRAMATIC DROP IN AGRICULTURAL PRICES IN THE 1920S WAS A DIRECT BLOW TO THE LIVELIHOODS OF AMERICAN FARMERS. WHEAT, CORN, AND OTHER STAPLE CROPS SAW THEIR PRICES PLUMMET BY MORE THAN HALF IN SOME CASES. THIS MEANT THAT FARMERS WERE OFTEN SELLING THEIR PRODUCE FOR LESS THAN IT COST TO PRODUCE IT, LEAVING THEM WITH NO SURPLUS INCOME AND UNABLE TO MEET THEIR FINANCIAL OBLIGATIONS.

MORTGAGE DEFAULTS AND FORECLOSURES

AS FARM INCOMES COLLAPSED, SO DID FARMERS' ABILITY TO SERVICE THEIR FARM MORTGAGES. MANY BANKS HELD THESE MORTGAGES AS ASSETS. WITH WIDESPREAD DEFAULTS, THE VALUE OF THESE ASSETS PLUMMETED, LEADING TO SIGNIFICANT LOSSES FOR THE BANKS. FORECLOSURES, WHILE INTENDED TO RECOVER SOME OF THE DEBT, OFTEN RESULTED IN BANKS TAKING POSSESSION OF UNPRODUCTIVE FARMLAND, FURTHER BURDENING THEIR BALANCE SHEETS.

FLAWED MONETARY POLICY AND THE FEDERAL RESERVE

THE ACTIONS, OR INACTIONS, OF THE FEDERAL RESERVE SYSTEM PLAYED A CRITICAL ROLE IN EXACERBATING THE GREAT DEPRESSION AND CONTRIBUTING TO BANK FAILURES. ESTABLISHED IN 1913 TO PROVIDE A MORE STABLE FINANCIAL SYSTEM, THE FED'S RESPONSE TO THE UNFOLDING CRISIS WAS LARGELY INADEQUATE AND, IN MANY INSTANCES, COUNTERPRODUCTIVE. INSTEAD OF ACTING AS A LENDER OF LAST RESORT, PROVIDING MUCH-NEEDED LIQUIDITY TO SOLVENT BUT TEMPORARILY ILLIQUID BANKS, THE FED ALLOWED NUMEROUS BANKS TO FAIL.

KEY POLICY MISTAKES INCLUDED A CONTRACTIONARY MONETARY POLICY, CHARACTERIZED BY RAISING INTEREST RATES AND REDUCING THE MONEY SUPPLY WHEN THE ECONOMY WAS ALREADY IN A SEVERE DOWNTURN. THIS TIGHTENED CREDIT CONDITIONS FURTHER, MAKING IT EVEN HARDER FOR BUSINESSES AND INDIVIDUALS TO BORROW AND REPAY DEBTS, AND CONSEQUENTLY INCREASING THE PRESSURE ON BANKS. THE FED'S ADHERENCE TO THE GOLD STANDARD ALSO LIMITED ITS FLEXIBILITY TO EXPAND THE MONEY SUPPLY.

CONTRACTIONARY MONETARY POLICY

IN THE EARLY STAGES OF THE DEPRESSION, THE FEDERAL RESERVE PURSUED POLICIES THAT WERE TOO RESTRICTIVE. THE GOAL WAS OFTEN TO PROTECT THE GOLD STANDARD AND PREVENT GOLD OUTFLOWS, WHICH MEANT LIMITING THE AMOUNT OF MONEY IN CIRCULATION. THIS LED TO A SHARP DECREASE IN THE MONEY SUPPLY, MAKING IT MORE EXPENSIVE TO BORROW AND INVEST, AND CONTRIBUTING TO DEFLATION.

FAILURE TO ACT AS A LENDER OF LAST RESORT

A CRUCIAL ROLE OF A CENTRAL BANK IS TO PROVIDE LIQUIDITY TO THE BANKING SYSTEM DURING TIMES OF STRESS. THE FEDERAL RESERVE FAILED TO FULFILL THIS ROLE EFFECTIVELY DURING THE GREAT DEPRESSION. MANY BANKS THAT WERE FUNDAMENTALLY SOUND BUT FACING A SHORTAGE OF CASH DUE TO WIDESPREAD WITHDRAWALS WERE DENIED THE EMERGENCY LOANS THEY NEEDED TO STAY AFLOAT. THIS INACTION DIRECTLY LED TO THE FAILURE OF MANY SOLVENT INSTITUTIONS, TURNING A FINANCIAL CRISIS INTO A SYSTEMIC COLLAPSE.

THE PSYCHOLOGY OF FEAR: BANK RUNS AND PANICS

PERHAPS THE MOST VISUALLY DRAMATIC AND DEVASTATING CAUSE OF BANK FAILURES DURING THE GREAT DEPRESSION WAS THE PHENOMENON OF BANK RUNS. ONCE PUBLIC CONFIDENCE IN THE BANKING SYSTEM BEGAN TO ERODE, DRIVEN BY NEWS OF SPECULATIVE LOSSES, BUSINESS FAILURES, AND EARLIER BANK COLLAPSES, DEPOSITORS BECAME INCREASINGLY ANXIOUS ABOUT THE SAFETY OF THEIR FUNDS. THIS ANXIETY, AMPLIFIED BY RUMORS AND WORD-OF-MOUTH, OFTEN LED TO A MASS WITHDRAWAL OF DEPOSITS.

A BANK RUN OCCURS WHEN A LARGE NUMBER OF CUSTOMERS WITHDRAW THEIR DEPOSITS SIMULTANEOUSLY BECAUSE THEY

BELIEVE THE BANK IS INSOLVENT. BANKS OPERATE ON A FRACTIONAL RESERVE SYSTEM, MEANING THEY ONLY KEEP A FRACTION OF THEIR DEPOSITS IN CASH AND LEND OUT THE REST. IF TOO MANY DEPOSITORS DEMAND THEIR MONEY BACK AT ONCE, EVEN A SOLVENT BANK CAN BECOME ILLIQUID AND BE FORCED TO CLOSE. THIS, IN TURN, CREATES A CONTAGION EFFECT, WHERE THE FAILURE OF ONE BANK FUELS FEAR AND TRIGGERS RUNS ON OTHER, EVEN HEALTHY, INSTITUTIONS. THE PANIC ITSELF BECAME A SELF-FULFILLING PROPHECY.

LOSS OF CONFIDENCE AND CONTAGION

THE INITIAL FAILURES OF BANKS, HOWEVER CAUSED, INSTILLED A DEEP SENSE OF FEAR AMONG THE PUBLIC. NEWS OF A BANK CLOSING ITS DOORS SPREAD RAPIDLY, LEADING DEPOSITORS AT OTHER BANKS TO QUESTION THE STABILITY OF THEIR OWN INSTITUTIONS. THIS LACK OF CONFIDENCE MEANT THAT EVEN RUMORS OF FINANCIAL TROUBLE COULD TRIGGER A PANIC.

THE DOMINO EFFECT OF WITHDRAWALS

WHEN A BANK RUN BEGAN, DEPOSITORS RUSHED TO WITHDRAW THEIR MONEY. TO MEET THESE DEMANDS, BANKS WERE FORCED TO SELL ASSETS, OFTEN AT FIRE-SALE PRICES, TO RAISE CASH. THIS DEPLETED THEIR RESERVES AND FURTHER WEAKENED THEIR FINANCIAL POSITION. THE FAILURE OF ONE BANK OFTEN LED TO RUNS ON OTHER BANKS, CREATING A DOMINO EFFECT THAT QUICKLY SPREAD THROUGHOUT THE FINANCIAL SYSTEM.

INADEQUATE BANKING REGULATION AND SUPERVISION

THE REGULATORY FRAMEWORK GOVERNING BANKS IN THE UNITED STATES PRIOR TO AND DURING THE GREAT DEPRESSION WAS FRAGMENTED AND INSUFFICIENT TO PREVENT THE EXCESSES THAT LED TO THE CRISIS. A PATCHWORK OF STATE AND FEDERAL REGULATIONS MEANT THAT OVERSIGHT WAS OFTEN INCONSISTENT AND LACKED THE TEETH TO ENFORCE SOUND BANKING PRACTICES. THIS ENVIRONMENT ALLOWED FOR THE PROLIFERATION OF RISKY BEHAVIORS AMONG BANKS, INCLUDING EXCESSIVE LENDING AND SPECULATIVE INVESTMENTS.

SUPERVISION WAS ALSO WEAK. BANK EXAMINERS OFTEN LACKED THE AUTHORITY OR THE EXPERTISE TO IDENTIFY AND ADDRESS SYSTEMIC RISKS EFFECTIVELY. THERE WAS LITTLE OVERSIGHT OF THE INCREASINGLY COMPLEX FINANCIAL INSTRUMENTS AND INTERCONNECTIONS THAT WERE DEVELOPING WITHIN THE BANKING SECTOR. THE ABSENCE OF ROBUST REGULATORY MECHANISMS MEANT THAT THE FINANCIAL SYSTEM WAS ILL-EQUIPPED TO ABSORB THE SHOCKS THAT ULTIMATELY LED TO THE WIDESPREAD BANK FAILURES.

FRAGMENTED REGULATORY STRUCTURE

THE US BANKING SYSTEM WAS, AND TO SOME EXTENT STILL IS, CHARACTERIZED BY A DUAL BANKING SYSTEM WHERE BANKS CAN BE CHARTERED AND SUPERVISED BY EITHER STATE OR FEDERAL AUTHORITIES. THIS CREATED A COMPLEX AND SOMETIMES CONTRADICTORY REGULATORY LANDSCAPE, MAKING IT DIFFICULT TO IMPLEMENT UNIFORM STANDARDS AND ENFORCE THEM CONSISTENTLY.

LACK OF DEPOSIT INSURANCE

CRUCIALLY, THERE WAS NO FEDERAL DEPOSIT INSURANCE IN PLACE BEFORE THE CREATION OF THE FDIC IN 1933. THIS MEANT THAT DEPOSITORS HAD NO GUARANTEE THAT THEIR MONEY WOULD BE RETURNED TO THEM IF A BANK FAILED. THIS ABSENCE OF A SAFETY NET SIGNIFICANTLY HEIGHTENED THE FEAR AND URGENCY DURING BANK RUNS, AS DEPOSITORS HAD EVERYTHING TO LOSE.

INTERCONNECTEDNESS OF THE FINANCIAL SYSTEM

THE MODERN FINANCIAL SYSTEM IS CHARACTERIZED BY A HIGH DEGREE OF INTERCONNECTEDNESS, AND THIS WAS NO LESS TRUE IN THE LEAD-UP TO THE GREAT DEPRESSION. BANKS LENT MONEY TO EACH OTHER, INVESTED IN EACH OTHER'S SECURITIES, AND RELIED ON EACH OTHER FOR VARIOUS FINANCIAL SERVICES. THIS INTRICATE NETWORK MEANT THAT THE FAILURE OF ONE INSTITUTION COULD HAVE SEVERE REPERCUSSIONS FOR MANY OTHERS.

WHEN A BANK FAILED, IT OFTEN DEFAULTED ON ITS OBLIGATIONS TO OTHER BANKS, LEADING TO LOSSES FOR THOSE INSTITUTIONS. THIS COULD TRIGGER A LIQUIDITY CRISIS THROUGHOUT THE SYSTEM, AS BANKS BECAME HESITANT TO LEND TO ONE ANOTHER, FEARING THAT THEIR COUNTERPARTIES MIGHT BE NEXT TO FAIL. THIS BREAKDOWN IN INTERBANK LENDING CHOKED OFF CREDIT, FURTHER STRANGLING BUSINESSES AND CONTRIBUTING TO THE ECONOMIC CONTRACTION. THE SYSTEMIC NATURE OF THE CRISIS MEANT THAT THE PROBLEMS WERE NOT CONFINED TO A FEW ISOLATED INSTITUTIONS BUT RATHER SPREAD LIKE A CONTAGION.

INTERBANK LENDING AND CREDIT MARKETS

BANKS RELY ON EACH OTHER FOR SHORT-TERM LOANS IN THE INTERBANK MARKET TO MANAGE THEIR DAILY LIQUIDITY NEEDS. DURING THE DEPRESSION, AS CONFIDENCE ERODED, BANKS BECAME RELUCTANT TO LEND TO EACH OTHER. THIS FREEZING OF CREDIT MARKETS MEANT THAT EVEN HEALTHY BANKS STRUGGLED TO OBTAIN THE SHORT-TERM FUNDING NECESSARY TO MEET THEIR OBLIGATIONS, LEADING TO A CASCADING SERIES OF FAILURES.

CROSS-OWNERSHIP AND INVESTMENT LINKAGES

FINANCIAL INSTITUTIONS ALSO HELD INVESTMENTS IN EACH OTHER'S DEBT AND EQUITY. THE FAILURE OF ONE BANK MEANT THAT ITS ASSETS, INCLUDING HOLDINGS IN OTHER BANKS, WOULD BE LIQUIDATED, CAUSING LOSSES FOR THOSE OTHER INSTITUTIONS. THIS WEB OF FINANCIAL RELATIONSHIPS MEANT THAT A SHOCK TO ONE PART OF THE SYSTEM COULD QUICKLY PROPAGATE THROUGHOUT.

INTERNATIONAL ECONOMIC FACTORS

WHILE THE FOCUS IS OFTEN ON DOMESTIC CAUSES, INTERNATIONAL ECONOMIC FACTORS ALSO PLAYED A SIGNIFICANT ROLE IN THE SEVERITY OF THE GREAT DEPRESSION AND THE SUBSEQUENT BANK FAILURES. THE INTERCONNECTEDNESS OF THE GLOBAL ECONOMY MEANT THAT FINANCIAL AND ECONOMIC PROBLEMS IN ONE COUNTRY COULD QUICKLY SPREAD TO OTHERS.

THE AFTERMATH OF WORLD WAR I LEFT MANY EUROPEAN NATIONS BURDENED WITH WAR DEBTS AND REPARATIONS. THE UNITED STATES, AS A MAJOR CREDITOR NATION, WAS INTRICATELY LINKED TO THE FINANCIAL STABILITY OF THESE COUNTRIES. WHEN ECONOMIC DOWNTURNS BEGAN IN EUROPE, THEY HAD RIPPLE EFFECTS BACK TO THE US. FURTHERMORE, THE INTERNATIONAL GOLD STANDARD, WHILE INTENDED TO PROMOTE STABLE EXCHANGE RATES, ALSO MEANT THAT MONETARY POLICY WAS CONSTRAINED BY GOLD RESERVES, LIMITING THE ABILITY OF NATIONS TO RESPOND TO ECONOMIC CRISES

EFFECTIVELY.

WAR DEBTS AND REPARATIONS

THE COMPLEX WEB OF WAR DEBTS OWED BY ALLIED NATIONS TO THE UNITED STATES, AND REPARATIONS OWED BY GERMANY TO THE ALLIED POWERS, CREATED SIGNIFICANT FINANCIAL STRAIN. THESE OBLIGATIONS, COUPLED WITH ATTEMPTS TO FINANCE THEM THROUGH INTERNATIONAL LENDING, MADE THE GLOBAL FINANCIAL SYSTEM HIGHLY SENSITIVE TO DISRUPTIONS.

THE GOLD STANDARD AND EXCHANGE RATE INSTABILITY

THE ADHERENCE TO THE GOLD STANDARD LIMITED THE FLEXIBILITY OF CENTRAL BANKS TO EXPAND THEIR MONEY SUPPLIES TO COMBAT ECONOMIC DOWNTURNS. COUNTRIES THAT LOST GOLD RESERVES WERE FORCED TO CONTRACT THEIR ECONOMIES TO MAINTAIN PARITY WITH GOLD. THIS RIGIDITY CONTRIBUTED TO THE DEFLATIONARY PRESSURES AND THE SPREAD OF THE CRISIS ACROSS BORDERS.

FAQ:

Q: WHAT WAS THE PRIMARY CAUSE OF BANK FAILURES DURING THE GREAT DEPRESSION?

A: WHILE THERE WASN'T A SINGLE PRIMARY CAUSE, A COMBINATION OF FACTORS, INCLUDING SPECULATIVE BUBBLES, AGRICULTURAL DISTRESS, FLAWED MONETARY POLICY, BANK RUNS FUELED BY FEAR, AND INADEQUATE REGULATION, COLLECTIVELY LED TO WIDESPREAD BANK FAILURES DURING THE GREAT DEPRESSION.

Q: HOW DID STOCK MARKET SPECULATION CONTRIBUTE TO BANK FAILURES?

A: BANKS INVESTED HEAVILY IN THE STOCK MARKET AND LENT MONEY TO SPECULATORS. WHEN THE MARKET CRASHED, BANKS SUFFERED SIGNIFICANT LOSSES ON THESE INVESTMENTS AND FACED A SURGE IN LOAN DEFAULTS, WEAKENING THEIR FINANCIAL STABILITY AND LEADING TO FAILURES.

Q: WHAT ROLE DID THE FEDERAL RESERVE PLAY IN THE BANK FAILURES?

A: THE FEDERAL RESERVE'S CONTRACTIONARY MONETARY POLICIES, INCLUDING RAISING INTEREST RATES AND FAILING TO ACT AS A SUFFICIENT LENDER OF LAST RESORT TO STRUGGLING BANKS, EXACERBATED THE CRISIS AND ALLOWED MANY SOLVENT INSTITUTIONS TO FAIL.

Q: WHAT IS A BANK RUN AND HOW DID IT CAUSE BANK FAILURES?

A: A BANK RUN OCCURS WHEN A LARGE NUMBER OF DEPOSITORS WITHDRAW THEIR MONEY SIMULTANEOUSLY DUE TO FEAR OF A BANK'S INSOLVENCY. BECAUSE BANKS ONLY HOLD A FRACTION OF DEPOSITS IN CASH, A MASS WITHDRAWAL CAN LEAVE EVEN A SOLVENT BANK ILLIQUID AND UNABLE TO MEET ITS OBLIGATIONS, LEADING TO FAILURE.

Q: WERE RURAL BANKS MORE SUSCEPTIBLE TO FAILURE THAN URBAN BANKS?

A: YES, RURAL BANKS WERE PARTICULARLY VULNERABLE DUE TO THE SEVERE DISTRESS IN THE AGRICULTURAL SECTOR. THEY WERE HEAVILY RELIANT ON FARMERS FOR DEPOSITS AND HELD MANY FARM MORTGAGES, WHICH BECAME INCREASINGLY DEFAULTED

AS COMMODITY PRICES PLUMMETED.

Q: DID THE ABSENCE OF DEPOSIT INSURANCE CONTRIBUTE TO THE BANK FAILURES?

A: ABSOLUTELY. THE LACK OF FEDERAL DEPOSIT INSURANCE MEANT THAT DEPOSITORS HAD NO GUARANTEE OF RECOVERING THEIR FUNDS IF A BANK FAILED. THIS LACK OF A SAFETY NET AMPLIFIED THE PANIC AND URGENCY DURING BANK RUNS.

Q: HOW DID THE INTERCONNECTEDNESS OF THE FINANCIAL SYSTEM LEAD TO WIDESPREAD FAILURES?

A: BANKS LENT MONEY TO EACH OTHER AND HELD INVESTMENTS IN EACH OTHER. THE FAILURE OF ONE BANK COULD LEAD TO LOSSES FOR OTHER BANKS, CREATING A DOMINO EFFECT AND A FREEZE IN INTERBANK LENDING, WHICH CHOKED OFF CREDIT AND LED TO FURTHER FAILURES THROUGHOUT THE SYSTEM.

Q: WHAT INTERNATIONAL ECONOMIC FACTORS CONTRIBUTED TO THE BANK FAILURES IN THE US?

A: POST-WORLD WAR I WAR DEBTS AND REPARATIONS, AND THE RIGID INTERNATIONAL GOLD STANDARD, CREATED FINANCIAL INSTABILITY GLOBALLY. ECONOMIC DOWNTURNS IN EUROPE HAD RIPPLE EFFECTS BACK TO THE US, AND THE GOLD STANDARD LIMITED THE ABILITY OF CENTRAL BANKS TO RESPOND EFFECTIVELY TO CRISES.
